Connect all teams in an easy and collaborative Document Management Solution

RIB | Project

Connect all teams in an easy and collaborative Document Management Solution

Manage all project information in one place

Use RIB Project as your centralized Document Management Solution on any construction project regardless of size, phases, and complexity. Ensure controlled and efficient project communication and collaboration between all stakeholders from the office to the field. Improve project outcomes, reduce rework risks and get full documentation and traceability throughout the entire project lifecycle.

Strong Collaboration

RIB Project helps you manage and share all project information from precon to closeout. Connect disperse teams, get seamless collaboration across disciplines and stakeholders, and communicate effectively to increase day-to-day efficiency.

Right Data At The Right Time

Reduce rework, delays and miscommunication with standardized and automated workflows and approval procedures. Guarantees that teams only receive relevant material, improve coordination and enhance constructability on your projects.
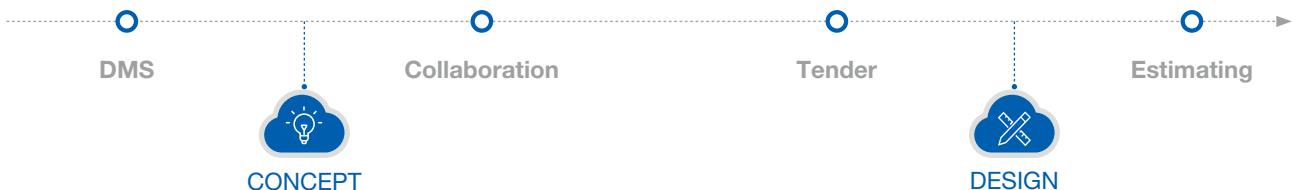

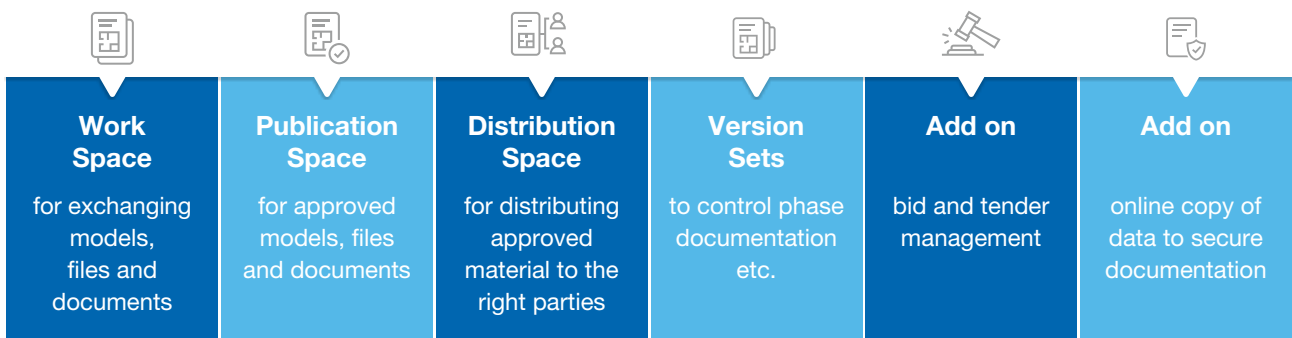

Full Documentation

Keep track of all relevant project information in one place and get a complete overview. Get full documentation and traceability into all actions and files in your project. Resolve any potential disputes using the non-editable file log.

Access To Data Anywhere

With RIB Project you get a cloud-based solution where both field and office teams can access project information, models and documents across multiple devices and locations. Communicate in real-time and work productively anywhere, anytime.

Keep your project on track with RIB Project

Work Space	Publication Space	Distribution Space	Version Sets	Add on	Add on
for exchanging models, files and documents	for approved models, files and documents	for distributing approved material to the right parties	to control phase documentation etc.	bid and tender management	online copy of data to secure documentation

Connect all teams in an easy and collaborative Document Management Solution

Easy, secure and effective collaboration

Access to all project information anywhere, anytime

## Advantages to RIB Project

- Manage and share files, drawings, and other documents in a structured and organized environment.

- Adaptable to any construction project, regardless of size, phase, and complexity.

- Easy overview, efficient search function and lots of features, such as preview, compare and integrated 3D & BIM viewer.

- Prevent misunderstandings, errors and inappropriate duplications with version set control and full documentation and traceability.

- Control and customize user permissions and ensure easy access whether on PC, tablet or mobile.

> **"It is a great advantage to have a common standard, templates and structure, as it saves time and administration. It is actually quite liberating that we have decided that all projects should be handled in RIB Project."**

Making engineering and construction
more efficient and sustainable

Managing the entire building lifecycle from planning to construction, the development of our powerful portfolio of software solutions is driven by industry expertise, best practice and a passion to remain at the cutting edge of technology. Ultimately, connecting people, processes and data in innovative ways to ensure customers always complete projects within budget, on time and to quality, while reducing their carbon footprint.
